BELDEN OFFERS ALL-NEW CATALOG ON FIBEREXPRESS® OPTICAL FIBER SYSTEMS, CABLING AND CONNECTIVITY COMPONENTS

RICHMOND, IN – Belden (NYSE: BDC), a world leader in the development of signal transmission solutions for the enterprise, industrial, data center, building management, broadcast, and security markets, is pleased to announce the availability of a brand new catalog detailing its complete line of *FiberExpress* optical fiber products for today's advanced networking applications.

The 60-page, full color catalog offers an extensive array of information, tables and photos – including selection guides, part numbers, specification tables and ordering information – for the *FiberExpress* family of products, which include end-to-end optical fiber systems, cables, connectivity components and accessories. Also detailed are Belden's technical support services, which include topology design assistance and product selection.

Belden *FiberExpress* Solutions encompass a wide range of multimode and single-mode cables, connectivity hardware, patch cords, cable assemblies, field connectors, work area outlets and accessories. All are designed and engineered to provide seamless integration and interoperability in support of centralized, in-building or campus backbone systems, pre-terminated systems, fiber-to-the-desk (FTTD) systems, pre-terminated systems, and Secure/Keyed LC systems.

Belden *FiberExpress* Solutions are much more than an assemblage of top-performing products. The company offers a total system approach to optical fiber cabling designed to provide less complex and more cost-effective installation, superior network performance and reliability, and more efficient cable management than traditional fiber optic cabling system installations. For users, this total system methodology helps to reduce installation time and total cost of ownership, while allowing flexibility for future network growth and expansion.

To request a copy of the new Belden *FiberExpress* Optical Fiber Catalog, contact Belden at P.O. Box 1980, Richmond, Indiana 47375, 1.800.BELDEN.1. FAX: 765.983.5294. Or download a copy at our Web site: www.belden.com.

About Belden

Sending All the Right Signals – from industrial automation to data centers, from broadcast studios to aerospace, from cutting-edge wireless communications to consumer electronics, Belden people are committed to delivering the best signal transmission solutions in the world. Our associates worldwide work in copper cable, fiber, wireless technology, connectors, switches and active components to bring voice, video and data to your mission-critical application. With 2007 revenue of \$2.0 billion, Belden has manufacturing capability in North America, Europe and Asia.
