BELDEN AND BYRES SECURITY INC. JOIN FORCES TO DEVELOP RUGGED INDUSTRIAL NETWORK SECURITY PRODUCTS

RICHMOND, IN – Belden and Byres Security Inc. (BSI) have announced that they have signed a technology cooperation agreement to jointly launch new products later this year in the area of industrial network security. Utilizing BSI's expertise in providing practical solutions to protect industry from network and cyber threats, and Belden's leadership position in the automation market which features the Hirschmann™ line of active devices, the two companies look forward to delivering Complete Industrial Security Solutions for customers.

“As a global leader, Belden provides effective signal transmission solutions that include network devices designed for safety-critical applications for SCADA and industrial automation,” remarked Mark Cooksley, Product Manager for Network Security at Belden. “We are pleased to partner with BSI. Their deep expertise in the area of industrial security and their proven ability to deliver pragmatic solutions will add value to our Hirschmann range of automation and networking systems.”

Eric Byres, Chief Technology Officer of BSI, notes “Industry has become very reliant on the quality and consistency of its data streams, particularly for SCADA and automation. Systems and solutions need to be rugged – and it is for this reason that we are delighted to be working with Belden, a world leader in reliable industrial network products, to deliver simple and dependable security solutions for the Hirschmann range of products.”

About Belden

Belden is a customer focused company. We ensure that our customers' communications infrastructure issues are resolved and that they benefit from the best signal transmission performance for their investment. We deliver leading-edge copper and fiber cabling/connectivity systems, wireless technologies, and active switch devices. We employ customer-centric go-to-market strategies and we implement and retain world class manufacturing processes. Our partners span the globe, helping our customers design, install, operate and maintain their communications applications. And our experience is vast, including expertise in Enterprise, Industrial, Infrastructure, Transportation, Professional and Enterprise Audio and Video, and Government applications.
