**STAR
2009**

**Superior Technology
Award Recipient**

No NAB Show would be complete without recognition of new and exciting innovations and as soon as the exhibit hall opened on Monday, **TV Technology's** team scoured vender booths in the search for such noteworthy technologies. With so many new products at the NAB Show, judging is always difficult. However, the wait is over and here are the STAR Award winners this year.

Belden Corp.

Steven Lampen, Belden's multimedia technology manager, accepts the STAR Award presented for the company's type 7732LL low loss plenum-rated RG-11 type cable for transport of high-definition signals up to 3 Gbps.
