Total: 7 Items

- * Belden has identified the above list of products for potential uses in non-exempt applications as outlined in the Prop 65 Consent Judgement. Actual end-user application(s) may vary. Applies to product colors listed and all package/reel sizes.

Per the consent judgement, the following products are deemed to be **exempt** from any Proposition 65 warning requirements:

- Products which because of their size, weight, or function are handled infrequently (not typically plugged and unplugged);
- Products manufactured before September 1, 2003;
- Products distributed outside the state of California;
- Products used only as internal components not normally accessible during ordinary use;
- Products containing a Proposition 65 chemical only as part of the inner conductor(s) or other component not normally accessible during ordinary use.

A listing of exempt standard Belden products containing greater than 300ppm lead in the outer jacket may be found at www.belden.com on the *Electronics Division* web page (under EHS).

Belden is in the process of removing lead from our products. Products **manufactured before September 1, 2003** may contain lead even if not listed here. Contact Belden for information on products manufactured before September 1, 2003.
