

# Machine Building Line Card

Explore the industry's broadest portfolio of industrial solutions with products designed to improve machine performance and uptime. Whether on-machine or on the connected network, Belden products offer maximum uptime, safety and security for your mission-critical infrastructure.

- Especially designed to retain unmatched signal quality through bending, twisting, crushing and exposure to moisture, chemicals, UV rays and extreme temperatures
- The Belden cable portfolio includes industrial Ethernet, databus, multiconductor, VFD, flex, tray, control and instrumentation, and fiber cables
- Machine Builders rely on Belden Horizon to bring secure remote connectivity to equipment and machines from anywhere at any time

- Alpha Wire products are engineered to offer superior performance, flexibility, and reliability in motion control and robotics applications
- Alpha Wire's Machine Building portfolio includes Xtra-Guard Flex cables designed for high flex, high torsion, and continuous flex applications and custom cables that can be designed to meet application-specific requirements

- Hirschmann's broad portfolio of ruggedized switches, routers, security appliances, and edge devices addresses the unique challenges that Machine Builders face such as withstanding harsh environments, offering remote connectivity, and data orchestration
- These future-proof solutions allow Machine Builders to stay ahead of industry trends such as Ethernet adoption and increased bandwidth needs

- Lumberg Automation offers a complete connectorized plug-and-play solution for industrial applications
- The portfolio consists of connectors, receptacles, splitters, and IO systems designed to stand up to the harshest surroundings, such as dust, water, and heavy vibrations

- ProSoft Technology provides solutions to help Machine Builders increase production, reduce downtime, and lower operating and maintenance costs
- ProSoft's Machine Building portfolio includes ultra-fast roaming wireless radios with radio accessories such as radiating cable, antennas and surge protectors, as well as protocol converters
