Hi-Scom Managed Full GIGA POE/POE+ Switch

Compatible with Hirschmann Industrial Hivision Management Platform

**Key Features:**

- Ring technology delivers redundancy bandwidth for critical services and 50ms protection switching
- Hirschmann Industrial Hivision software for easy configuration and management of large networks
- Full GIGA design for high bandwidth application
- Full POE/POE+ design for power up application
- Variety of interface and port types to ensure flexibility and seamless integration of CCTV application

**Strong data transmission and POE performance**
Full GIGA and POE/POE+ interface and ports,
Max. Power Consumption 30W per port

**Ensure reliability and stability of data transmission**
- 40-75°C extend operating temperature,
  Redundancy power supply unit

**Easily configure and manage complex networks**
With intuitive provisioning software
BN44/BN48 Series Industrial full Gigabit Managed 6/10 Ports Ethernet Switch

The BN44/BN48 Series industrial full Gigabit managed 6/10 ports Ethernet switch with up to 4/8 10/100/1000Mbps PoE (IEEE 802.3af/at) ports, and 2 1000Mbps SFP ports, 4Mbits memory, and supports static Layer 3 routing, a full Gigabit network provides higher throughput than legacy Fast Ethernet networks (10/100Mbps). The BN44/BN48 Series switches can provide power and data directly through Ethernet cable, ideal for CCTV, ITS and building automation related applications.

Bn3049 Series Industrial full Gigabit Managed 26-port Ethernet Switch

The BN3049 Series industrial full Gigabit managed 26-port Ethernet switch with up to 24 10/100/1000Mbps PoE (IEEE 802.3af/at) ports (including 4 shared SFP ports), and 2 1000Mbps SFP ports, 4Mbits memory, and supports static Layer 3 routing. With a total switch fabric of 58Gbps, the BN3049 can handle large amounts of data linking to an industrial backbone or high-capacity servers, and has capability of providing wire-speed throughput in the temperature range from -25 to 65 degree Celsius without any packet loss and CRC error. It greatly simplifies the tasks of upgrading the industrial network for catering to increasing bandwidth demands.

The BN44/BN48 and BN3049 Series switches support multiple redundant ring technologies and features strong, rapid self-recovery capability to prevent interruptions. Both BN44/BN48 and BN3049 incorporate advanced ERPS (ITU-TG. 8032, Ethernet Ring Protection Switching) technology, Multiple Spanning Tree Protocol (802.1s MSTP), and redundant power input into industrial automation network to enhance system reliability in harsh factory environments. In a simple ring network, the recovery time of data link can be as fast as 20ms.

To fulfill the demand of High Power PoE for network applications with Gigabit speed transmission under wide temperature, BN44/BN48 and BN3049 provide 4/8/24 10/100/1000Mbps ports featuring IEEE 802.3at (PoE+), that combines up to 120/370-watt power output, fully meet the growing demand of higher power consuming network PDs (powered devices) such as PTZ network cameras, multi-channel (802.11a/b/g/n/ac) wireless LAN access points, etc.
The BN44/BN48 and BN3049 Series switches support advanced switch management functions, such as link aggregation, VLAN, Rapid Spanning Tree Protocol, Layer 2 to Layer 3 QoS, bandwidth control and IGMP snooping.

The BN44/BN48 and BN3049 Series switches not only provide excellent Layer 2 switching features, but also IPv4 /v6 software VLAN routing feature which allows to crossover different VLANs and different IP network for the purpose of having a highly-secured, flexible management.

The BN44/BN48 and BN3049 Series switches equipped with console, Web and SNMP management interfaces. For command line management, it can be accessed via Telnet, SSH, and the console port. Moreover, it also offers secure remote management via any standard-based management software by supporting SNMP v3 connection which encrypts the packet content at each session.

The BN44/BN48 and BN3049 Series switches offer comprehensive Layer 2 to Layer 4 Access Control List (ACL) for enforcing security to the edge. It can be used to restrict network access by denying packets based on source and destination IP address, TCP/UDP ports. Its protection mechanism also comprises 802.1x port-based and MAC-based user and device authentication. With the private VLAN function, communication between edge ports can be prevented to ensure user privacy.
# Technical Parameters

## Product Description
- **Port Type and Quantity**
  - 6 Ports in total: 4 x 10/100/1000 BASE-TX, RJ45 PoE+ ports; 2 x Gigabit SFP slots
  - 10 Ports in total: 8 x 10/100/1000 BASE-TX, RJ45 PoE+ ports; 2 x Gigabit SFP slots
  - 26 Ports in total: 20 x 10/100/1000 BASE-TX, RJ45 PoE+ ports; 4 x Gigabit Combo ports (10/100/1000 BASE-TX, RJ45 PoE+ or 1000 BASE-SFP), 2 x Gigabit SFP slots

## Number of Interface
- **Power Supply**
  - 1 x 4-pin
- **Console Interface**
  - 1 x RJ45 socket, serial interface for device configuration (RS-232: 115200bps-8-N-1)

## Network Size - cascading
- **Line / Star / Ring Topology**
  - Any

## Power Requirements
- **Operating Voltage**
  - Input: 48 V DC
  - Output: 120 W (Max) / 110/220 V AC, 0% - 20% V
  - Output: 150 W (Max) / 570 W (Max) @ 48 VDC

## Software
- **Management**
  - Serial interface, Web interface, HTTP/HTTPS, Telnet, SSH, SNMPv1/v2c/v3, Traps, LLDP, LLDP-MED

## Power Management
- **Redundancy functions**
  - STP (IEEE 802.1d), RSTP (IEEE 802.1w) and MSTP (IEEE 802.1s), ERPS (IEEE 802.1s), Link Aggregation Static, LACP

## Ambient Conditions
- **Temperature**
  - Operating: -40°C to +70°C
  - Storage/Transport: -50°C to +85°C
- **Humidity**
  - 5% - 95% (non-condensing)

## Mechanical Construction
- **Dimensions** (WxHxD)
  - 64x144x130mm
  - 440x44.5x350mm
- **Mounting**
  - DIN Rail
  - 19” control cabinet

## EMC Interference Immunity
- **EN 61000-4-2 electrostatic discharge**
  - 6 kV contact discharge, 8 kV air discharge
- **EN 61000-4-3 electromagnetic field**
  - 10 V/m (80 - 1000 MHz)
- **EN 61000-4-4 fast transients**
  - 2 kV power line, 1 kV data line
- **EN 61000-4-5 surge voltage**
  - power line: 2 kV (10/1000μs), 1 kV (10/1000μs), 1 kV data line
- **EN 61000-4-6 conducted immunity**
  - 10 V (150 kHz - 80 MHz)

## FCC CFR47 Part 15
- **FCC CFR47 Part 15 Class A**

## Packing List
- **Scope of Delivery**
  - Device, terminal blocks, operating manual

## Warranty
- **Warranty**
  - 5 Years
