Enclosures

Belden® introduces a series of enclosures that deliver cost savings and improve efficiency through enhanced cable management and ease of installation

A new range of Belden enclosures meets the unique requirements of network managers by providing a cost effective solution, designed for ease of installation whilst ensuring reliable protection for sensitive electronic equipment.

- Save time with flexible, versatile and easy-to-install solutions that work without fuss
- Keep down costs of installation, maintenance and overall footprint yet provide reliable protection for your sensitive electronic equipment
- Achieve maximum uptime thanks to these enclosures' significant contribution to your network's overall reliability

To complement its family of networking products, Belden has introduced a series of modular enclosures, fully compatible with all Belden copper and fibre IBDN connectivity products, including patch panels, patch cords, as well as pre-terminated copper and fiber solutions.

Fully compatible with the new range of Belden Power Distribution Units (PDUs) and Belden PatchPro®, Belden's intelligent patching system, these modular enclosures are designed for maximum convenience. They are ready to underpin any network's cooling, cabling and power management performance in terms of infrastructure and unit configuration, as well as the integration of accessories.

As the supplier of the industry's most flexible and reliable solutions, Belden has created these enclosures so they can be used as part of a fully integrated Belden IBDN solution, in which all components work together seamlessly. Moreover a fully bundled Belden solution ensures that users receive dependable service

and superior support from the most trusted name in the industry.

Applications

This series of enclosures is designed to provide the flexibility and versatility needed to house and protect delicate electronic equipment, and allow the right amount of room needed for maximum functionality. They fully support the quality and reliability of networking applications, ranging from the enterprise to data centers.

A Greener Alternative

The Belden range of enclosures are based on a flat packed design enabling easy on-site handling. Whilst delivering the same strength, quality and performance as pre-assembled flat-packed units help to save on packaging, storage and transportation costs, thus reducing the products' overall impact on the environment enclosures.

Your Benefits

New Belden enclosures provide a flexible solution, that can be fully adapted to the needs of a particular application. Moreover the enclosures offer a cost-effective solution, as they are easy to install and make maximum use of available space. They are designed to make a significant contribution to any network's overall reliability, ensuring maximum uptime throughout the network's lifecycle.
